

FOR IMMEDIATE RELEASE: April 14, 2022

OnProcess Gains Global ISO/IEC 27001:2013 Accreditation

Boston, MA: OnProcess Technology, a global pioneer powering the world's circular service value chains, announced today that it has earned ISO/IEC 27001:2013 certification for its US business after an extensive audit of the company's internal operations. With this recent certification, OnProcess now has ISO/IEC 27001:2013 accreditation across three continents and its entire global operations, having previously been accredited in EMEA and India.

ISO/IEC 27001:2013 is the leading international standard focused on information security, published by the International Organization for Standardization (ISO), in partnership with the International Electrotechnical Commission (IEC). The standard provides requirements for establishing, implementing, maintaining, and continually improving an Information Security Management System (ISMS).

OnProcess's certification was issued following an audit by an independent and accredited certification body, on successful completion of a formal, rigorous audit process that showed OnProcess has invested in the global people, processes, and technology to protect data according to international best practices. Meeting the rigorous criteria for accreditation on three continents is an additional proof for OnProcess' customers (and their customers) and partners that their data is safeguarded in compliance with the highest international standards.

"Our global ISO/IEC 27001:2013 accreditation is evidence that OnProcess information security protocols ensure the confidentiality, security, and integrity of the digital information it hosts, at the highest level" said Darren O'Meara, CIO of OnProcess. "This certification indicates that we are able to protect the personal information of our clients and their customers in accordance with the highest security management and compliance parameters in the industry, and that we follow internationally recognized standards and guidelines with our security procedures. The certification process has also enabled us to create a culture of continual improvement and is part of the ethos of ISO 27001".

About OnProcess Technology, Inc.

OnProcess supplies technology and services that power the world's circular service supply chains. Providing managed services and digital transformation expertise that streamlines processes, maximizes customer lifetime value, and improves 'circular' sustainability goals, OnProcess is a trusted advisor to many of the world's leading computer, networking, med-tech, wireless, telecommunications, and IT companies.
